

Since 1980, **Zeefax** has built a reputation on its ability to provide reliable and excellent engineering services to the Power and Process sectors worldwide, and today has the technical expertise and capability to specify, engineer, manufacture and deliver a wide range of turbine supervisory and condition monitoring products and systems.

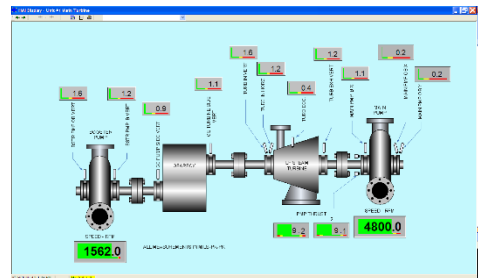

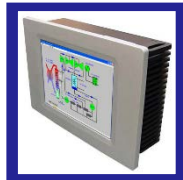

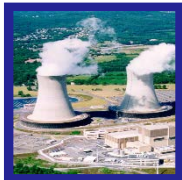

### PowerPAC™ Overview

**PowerPAC™** is an advanced and extremely capable data acquisition and analysis software tool, designed to meet the rigorous requirements expected for modern data acquisition and analysis systems. The many advanced features and on-line analysis capabilities make it ideal for process, power and petrochemical plants, but it is equally at home in the laboratory or for specialist research applications.

### Acquire and Share Data

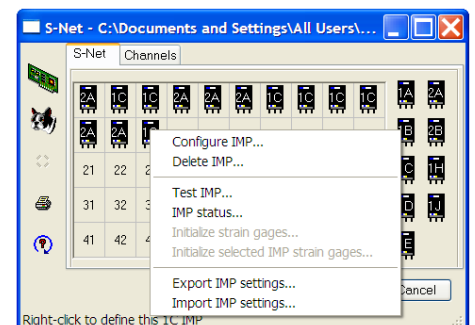

**PowerPAC™** provides all of the acquisition, analysis and data exchange capabilities required within a single integrated package, and industry standard open architecture design enables it to seamlessly interface to many state-of-the-art Supervisory, Distributed Control and Data Acquisition Systems.

**PowerPAC™** is packed with friendly and easy to use high level menus allowing all of the advanced features to be quickly configured, making it ideally suited for use by both Plant Operators and Data Analysts.

The suite of software data Interface Modules and the graphical Human-Machine Interface (HMI) can be combined with a wide selection of external interfaces and operating platforms to meet individual requirements and system application needs.

Using OPC, **PowerPAC™** can easily be interfaced to most Control Systems and Data Historian Databases.
