

Since 1980, **Zeefax** has built an enviable reputation on its ability to provide excellent and reliable electrical and mechanical engineering services and solutions to the Drilling industry in many countries around the world. This experience, combined with a well-trained, highly skilled and motivated multi-disciplined workforce, based at our own fully equipped manufacturing facility in the South of England, means that we are the one-stop-shop in the UK for all electro-mechanical parts and projects, targeted mainly at the Drilling and associated sectors.

SCR Systems

Today, **Zeefax** has the technical expertise and manufacturing facilities – all based in the UK - to build complete turnkey SCR packages for drilling rigs and platforms.

Systems can be based on the established and well proven technology of the legacy Hill Graham / Ross Hill modules and designs, or on more modern hybrid / digital technology for state-of-the-art control systems.

- ❖ Complete turnkey systems
- ❖ Ross Hill type and modern digital designs
- ❖ Land rig PCR's or offshore systems
- ❖ UK based manufacturing and test
- ❖ Full technical support

System Upgrades

Zeefax has the engineering expertise and experience to design, build and install extensions and upgrades to existing legacy systems.

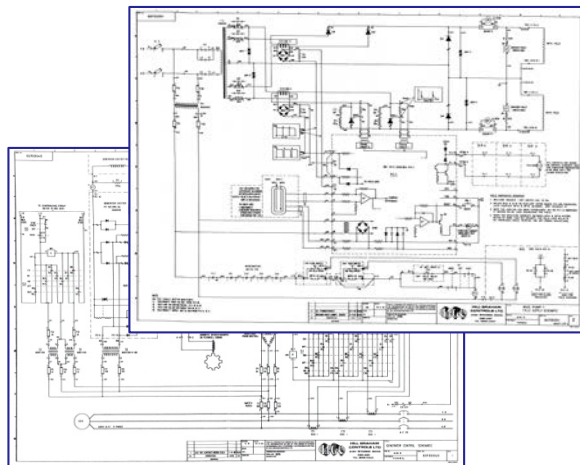

...more power

Where additional generating capacity is required, we can conduct a fault level study and examine the feasibility of upgrading a system and follow that up with a modification design and manufacturing program to complete the job.

...more mud pumps

Modern drilling practices often demand additional mud pumping capacity which was not envisioned in older systems. **Zeefax** can revitalise an existing rig by adding capacity for a third Mud Pump by designing and engineering an additional mini-console.

Zeefax can undertake system re-engineering, system revitalisation and re-design projects, intended to preserve your initial investment and to ensure the continued reliability and relevance of your existing controls and equipment.

- ❖ **Additional Generator sections**
- ❖ **Third Mud Pump add-ons**
- ❖ **Mini consoles and houses**
- ❖ **Technical feasibility studies**
- ❖ **Power coordination studies**

Contact us

For all Hill Graham services and manufactured parts, **Zeefax** is now the preferred supplier worldwide, as well as providing a host of other related Drilling services including...

- ❖ Site Surveys and Field Service Support
- ❖ Coordination Studies
- ❖ GE752 Drive Motor Refurbishments
- ❖ SCR Refurbishments and Enhancements
- ❖ New design and build SCR systems – VFD and DC Systems
- ❖ SCR and PLC Training Courses

Please call us to find out more about how we can help to preserve your capital investment, through a program of works, carefully designed to optimise the utility and the performance of your Power System, whilst ensuring that it provides reliable and dependable operation for all your drilling applications.
