

Since 1980, **Zeefax** has built an enviable reputation on its ability to provide excellent and reliable electrical and mechanical engineering services and solutions to the Drilling industry in many countries around the world. This experience, combined with a well-trained, highly skilled and motivated multi-disciplined workforce, based at our own fully equipped manufacturing facility in the South of England, means that we are now the preferred single source in the UK for all electro-mechanical projects, targeted mainly at the Drilling and associated sectors.

B103 - SCR Blower Assembly

Zeefax are now an established supplier of new and spare parts for legacy SCR cabinets and systems, previously manufactured by Hill Graham and by other suppliers and manufacturers of similar systems.

Keep it cool

An important part of every system is the forced air cooling, which is vital to ensure continuity and reliability of operation of the SCR stacks.

It is essential that the heat generated during operation is reliably carried away, and Zeefax now produce a series of standard SCR Blower assemblies which are fully compatible with the blower assemblies used in legacy systems.

The Zeefax SCR Blowers are designed to operate with voltages up to 600 V @ 50 or 60 Hz (these need to be specified at the time of purchase) and may be configured with either Single or Duplex impellers and with or without base frames.

The Zeefax SCR Blowers can be leveraged to replace faulty or broken blowers with confidence.

In order to aid potential users with the selection of replacement blowers, we have created a simple form which can be used to provide the few technical details we require. In this way, we can ensure that any SCR Blower supplied by us is fully compatible with the existing assemblies, and will then install directly into the available location with minimal re-work required; please ask us for this form.

If you would like to know more about the range of available blowers, please call or email us, and we will be pleased to assist.

B103 - Specifications

Type	Duplex Blower assembly	
Motor	Dynamotor Decoster	
Supply Voltage	600/660 v, 3ph,	
Rated Output	2.2 kW	
Speed:	50 Hz	2800 RPM
	60Hz	3400 RPM
Left Impellor	64EL	
Right Impellor	64ER	
AV Mounts	117/118-18	
Mechanical Footprint (mm)	605 x 155	
Overall Dimensions L x W x H (mm)	605 x 275 x 226	
Weight	approx. 18
