

Since 1980, **Zeefax** has built an enviable reputation on its ability to provide excellent and reliable electrical and mechanical engineering services and solutions to the Drilling industry in many countries around the world. This experience, combined with a well-trained, highly skilled and motivated multi-disciplined workforce, based at our own fully equipped manufacturing facility in the South of England, means that we are now the preferred single source in the UK for all electro-mechanical projects, targeted mainly at the Drilling and associated sectors.

### Driller's Foot Throttle

**Zeefax is now an established supplier of both new and refurbished spare mechanical parts and assemblies for Hill Graham® Foot Throttles, as used on drilling rigs. The severe environment often leads to deterioration of both electrical and mechanical performance, necessitating removal of the unit followed by factory refurbishment and renovation.**

**Before...**

Typically, units arrive in poor condition - totally seized and unusable; they are then completely disassembled, thoroughly cleaned and de-scaled, and are fitted with new bearings, bearing blocks, hardware and seals, prior to re-wiring and calibration.

**and After.**

*Zeefax is able to provide both factory refurbishment of existing Foot Throttles and in cases where the deterioration is too severe for refurbishment, we can supply a brand new replacement to meet the specific needs of each installation.*

*If you would like to know more about the range of available Driller's Foot Throttles, please call or email us, and we will be pleased to assist.*
